ENTMA is a network involving a broad range of disciplines and stakeholders across health, social care, education and related sectors who are engaged in, or associated with, designing, delivering, regulating, evaluating, researching or commissioning training. The bi-annual ENTMA symposium is the longest running European conference event that specifically addresses issues related to training in the management of aggression and violence.

The blend of internationally renowned keynote speakers, workshops, and concurrent papers ensures the symposium will be a highly interactive event, with opportunities to exchange ideas and explore practical strategies related to all aspects of training in proactive prevention, early recognition, and the safe, skillful, and therapeutic management of complex behaviours including all manifestations of aggression within health, social care and education settings.

The symposium **invites abstracts** of concurrent papers, and especially welcomes abstracts **related to ‘Co-Creation’ ‘Safety’ or ‘Training’** aligned with the symposium theme.
